

I drive a truck for a living fm and am radio arn't forth a flip when it comes to traffic and weather report at all. My opioion is leave the am xmradio alone; beacsue we dont need lobbyists and polisticans and our lauzy goverment sticking there nose where it dont belong becasue they dont have a clue of what xm offers people on the road. Like there traffic report when you deliver to a major city it helps alot know the traffic and weather. They provide a really great service with music and everything that it offers; so leave it alone. Thank you for your corporation and this matter
